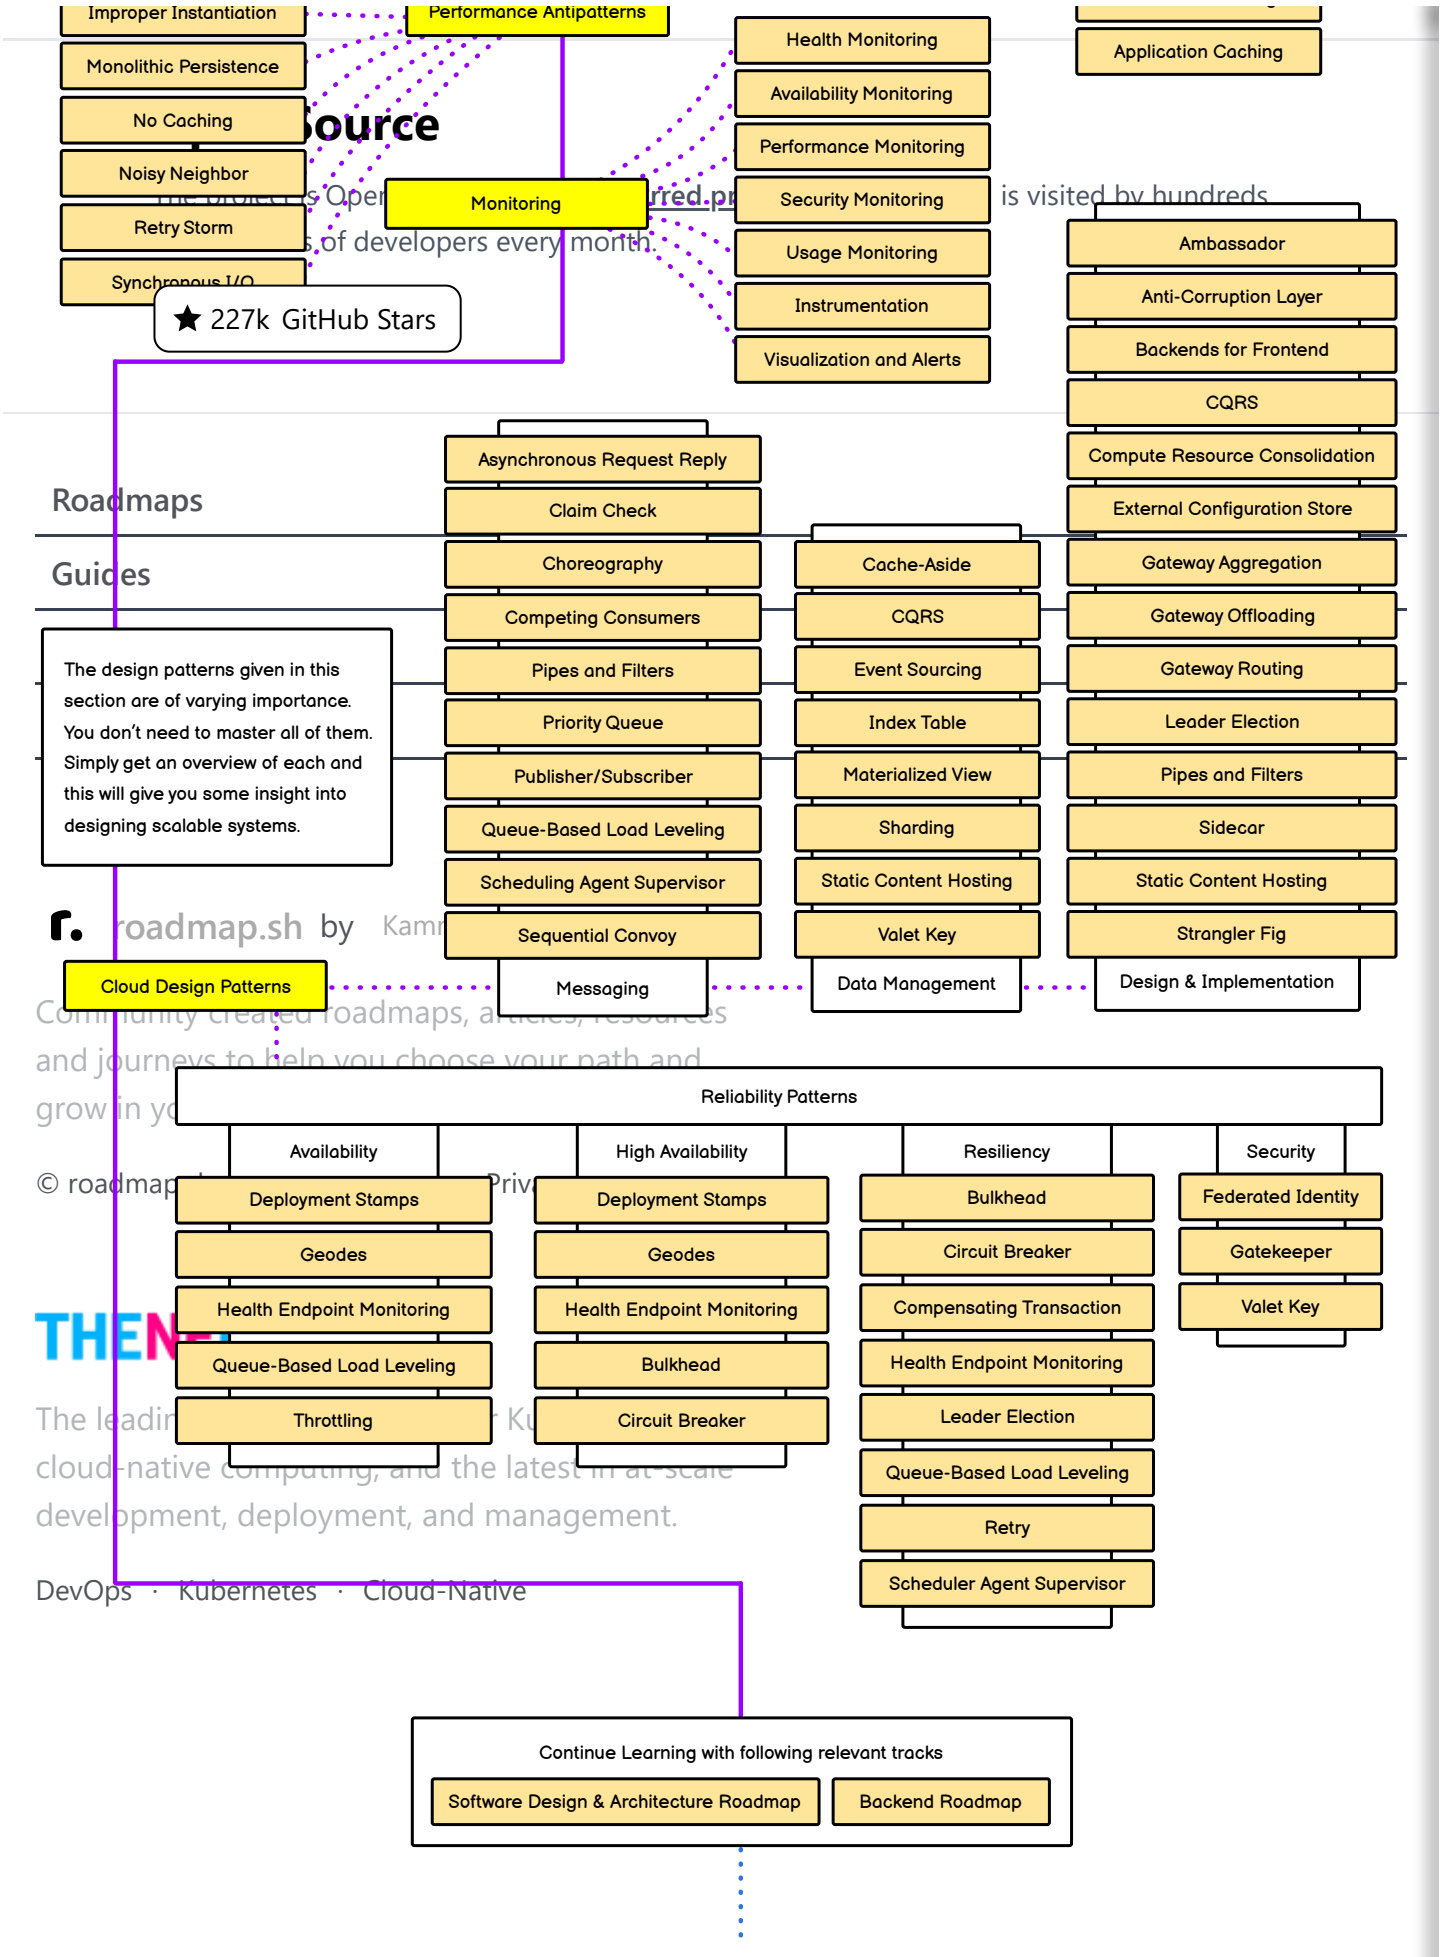
What is System Design
How to approach System Design?
Introduction
Who is this guide for?
Performance vs Scalability
Latency vs Throughput
Availability vs Consistency
AP - Availability + Partition Tolerance
CP - Consistency + Partition Tolerance
CAP Theorem
Returning Results
Schedule Driven
Event-Driven
Master-Slave
Master-Master
Replication
Active-Passive
Active-Active
Fail-Over
Consistency Patterns
Weak Consistency
Eventual Consistency
Strong Consistency
Background Jobs
Availability Patterns
Availability in Numbers
99.9% availability - three 9s
99.99% availability - four 9s
Avail. in Parallel vs Sequence
Domain Name System
Content Delivery Networks
Push CDNs
Pull CDNs
LB vs Reverse Proxy
Load Balancing Algorithms
Layer 7 Load Blancing
Layer-4 Load Balancing
Horizontal Scaling
Load Balancers
Application Layer
Microservices
Service Discovery
Key-Value Store
Document Store
Wide Column Store
Graph Databases
Replication
Sharding
Federation
Denormalization
SQL Tuning
SQL vs NoSQL
NoSQL
RDBMS
Databases
Refresh Ahead
Write-behind
Write-through
Cache Aside
Strategies
Back Pressure
Task Queues
Message Queues
Idempotent Operations
Asynchronism
Caching
Busy Database
Busy Frontend
Chatty I/O
Extraneous Fetching
Communication
HTTP
TCP
UDP
RPC
REST
gRPC
GraphQL
Client Caching
CDN Caching
Web Server Caching
Database Caching



Improper Instantiation
Monolithic Persistence
No Caching
Noisy Neighbor
Retry Storm
Synchronous I/O
Performance Antipatterns
Monitoring
Health Monitoring
Availability Monitoring
Performance Monitoring
Security Monitoring
Usage Monitoring
Instrumentation
Visualization and Alerts
Application Caching
Ambassador
Anti-Corruption Layer
Backends for Frontend
CQRS
Compute Resource Consolidation
External Configuration Store
Gateway Aggregation
Gateway Offloading
Gateway Routing
Leader Election
Pipes and Filters
Sidecar
Static Content Hosting
Strangler Fig
Design & Implementation
Asynchronous Request Reply
Claim Check
Choreography
Competing Consumers
Pipes and Filters
Priority Queue
Publisher/Subscriber
Queue-Based Load Leveling
Scheduling Agent Supervisor
Sequential Convoy
Messaging
Cache-Aside
CQRS
Event Sourcing
Index Table
Materialized View
Sharding
Static Content Hosting
Valet Key
Data Management
Cloud Design Patterns
Reliability Patterns
Availability
Deployment Stamps
Geodes
Health Endpoint Monitoring
Queue-Based Load Leveling
Throttling
High Availability
Deployment Stamps
Geodes
Health Endpoint Monitoring
Bulkhead
Circuit Breaker
Resiliency
Bulkhead
Circuit Breaker
Compensating Transaction
Health Endpoint Monitoring
Leader Election
Queue-Based Load Leveling
Retry
Scheduler Agent Supervisor
Security
Federated Identity
Gatekeeper
